SEASONS MEDICAL SPA ... HELP IN THE BATTLE AGAINST SHINE OC Eight™ Mattifying Gel –A New Concept in Shine Control

Approximately 80% of women are frustrated by "combination skin", and 30% describe their skin as "shiny" or "oily". The humidity and heat of an Ozarks' summer makes shine worse.

Facial shine occurs when hormones trigger the sebaceous glands to produce too much oil. The excess oil settles on the surface of the face giving the skin a shiny appearance and greasy feel.

Facial shine magnifies the appearance of facial redness and other minor blemishes. This can be particularly frustrating for women with acne and rosacea. Pores that are clogged frequently result in acne blemishes.

OC 8 can be the first weapon in the battle against oil. This revolutionary product works up to 8 hours absorbing excess oil, helping users achieve even-toned, beautifully matte skin. OC8 contains ACRYSORB® micro-particles that are specially designed with copolymer technology and work to permanently trap up to 6X their own volume in oil. The oil remains locked away – invisible to the naked eye – without compromising skin's natural moisture.

A carefully designed homecare program with appropriate products for cleansing, toning, and moisturizing, work with the OC8 to lessen the production of oil and appearance of blemishes.

Seasons' "Oil Control Facial" and "Deep Pore Cleanse Facial" are also powerful weapons. These treatments are designed to deeply cleanse, exfoliate, and purify combination and oily skin. There is even a special treatment for "backne", oily skin problems on your back. When you schedule your facial at Seasons, your licensed professional aesthetician will customize your facial and homecare recommendations to your specific needs. A relaxing facial also helps reduce your stress, a major contributor to breakouts.

Seasons' exclusive Mineral Makeup is non-comedogenic and offers a third weapon in the battle against shine. The smooth powdered makeup is easy to brush on, quick setting, and provides exceptional coverage without feeling heavy or greasy.

Seasons Medical Spa is a full-service medical spa, offering everything you need for summer beauty. Operated under the direction of board-certified dermatologist N. Eugene Morrow, M.D., who has practiced in Springfield for over 20 years, Seasons specializes in the latest medical aesthetic procedures. Treatments include IPL™ Photorejuvenation, Botox® Cosmetic Wrinkle Reduction, Restylane® Injectable Filler, microdermabrasion, chemical peels and laser hair removal. Seasons also offers traditional spa services such as customized facials and relaxation massages.

Located in the beautiful Bradford Place offices at 1531 E. Bradford Parkway, Seasons offers a luxurious destination for all your skincare needs. It is open weekdays and offers convenient evening and Saturday hours for the busy professional.

Seasons Medical Spa is located at 1531 E. Bradford Parkway, Suite 215, Springfield, MO 65804. For more information, please contact Cindy Morrow at 417-882-1133, or visit their website at www.SeasonsMedicalSpa.com.
